

Dear Kailan:

The 30-foot eyeball artwork, 'EYE', located in Pritzker Park, Chicago ("Giant Eyeball Installed at Pritzker Park") you shared with us was designed by Tony Tasset (Arndt) and installed on July 10, 2010. It was made by using "between 8,000 and 9,000 pounds of fiberglass and another 9,000 pounds of steel". This giant structure was manufactured by a Wisconsin-based company named "Fiberglass Animals, Shapes & Trademarks". This work is commissioned by Chicago Loop Alliance. The artwork was later removed from Chicago on November 10, 2010 ("See you later, Eye!").
